Exclusive Range of Innovative Appliances

Health Living & Kitchen Appliances

A Wish for Wellness

A wish for wellness...

The Hi-Tech group was established in 1995 with the objective of providing the best of health and living conditions across the country. In no time, the group has become a name familiar to every Indian household. A Pioneer in the world of RO, UF and UV based water purifiers, cold storage units and real estate sector, the group has stepped in the home appliances segment and is quickly sailing towards being a giant in the same.

A master class in inventive brilliance, Hi-Tech manufactures a wide variety of water treatment plants that range between 6L/hour to an unbelievable 1,00,000L/hour purifying capacity. With a mammoth production capacity of 5,000 domestic RO units and 125 Commercial purifying plants, Hi-Tech is one of the largest fish in the water world.

Having ISO 9001, 14001 and 18001 certification and being an Indian government approved agency for central sponsored projects, speaks volumes about the reliability and quality of the company. Selling through more than 45 direct sales branches & ever increasing business associates, the group is an integral part of the Indian markets.

Introducing Hi-Tech Appliances

Formed with the prime vision of making science meet everyday needs, Hi-Tech Appliances is the brainchild of the renowned Hi-Tech group. Blending cutting edge technology with premium quality, and catering to maximum requirements of every household is Hi-Tech's recipe of accelerating lifestyles with extreme comfort.

With world class quality products implementing the finest technology available and putting constant research to use, Hi-Tech ensures to give you products that are your companions everywhere. From your Kitchen to all your trips, Hi-Tech Appliances will find their use and place in your life. Classy designs, sharp technology, and unmatched power take the brand to a whole new degree of excellence.

A huge collection of products to choose from, and many more revolutionary products to join the list soon, Hi-Tech Appliances is constantly striving towards expanding its horizons. Targeting both established and emerging markets by extensive research and trend spotting, Hi-Tech is all set to go toe-to-toe with the biggest names in the world of household appliances. Improving lives with meaningful innovations, maximizing efficiency & minimising effort: Hi-Tech makes things possible.

Master Chef Appliances

Your kitchen holds the soul of your home. A kitchen that takes care of health, taste, saves time and takes all the stress away, is the kitchen you deserve. Throw away all the stuff that is taking up unnecessary space, using up too much power and too much of your time, adding to your effort & making your kitchen look like a store room. Hi-Tech's Master Chef Range brings you premium innovative appliances that can be tastefully implemented in any kitchen.

Claypot Multi Cooker 1.5L

Hi-Tech's Clay Pot Multi-cooker is a one of its kind patented product in the cooking range with a 100% natural and organic pot. It is designed using patented Korean technology. Based on the most primitive and classic forms of cooking, it is made from 3 types of clay moulded in 5 layers of a combined thickness of 5.5mm. Each featured layer is formed to serve its dedicated function. The Clay Pot is developed using 11 techniques and 28 extensive procedures and tests. The formation process takes place at 1350°C that completely eliminates the risk of any kind of poisonous elements in the materials used. It has been tested that over 90% of Teflon non-stick coating has some form of poisonous ingredient that may appear on repeated use. Absence of any such coating makes our Clay Pot a highly recommended product for all the users due to its emphasis on healthy living.

Poshtik Vacuum Blender

Hi-Tech brings you state of the art technology in its all new Poshtik Vacuum Blender with Anti-Oxidation. This blender offers everything that guarantees a 100% pure, effective and healthy blending. It operates on the basic principle of vacuuming. It takes out the air in container jar so as to prevent oxidation of the food item, reducing any kind of nutrient damage to zero and restoring all the vitamins, thereby making the food and juice 100% healthy, much more tasty and delicious. The vacuum so created also leads to no separation of the layers and eliminates any chances of inconsistency throughout the juices.

Slow Juicers Vs High Speed Juicers

Slow Juicer

Win

- No Oxidation
- No layers-Separation
- Upto 85% Juice Yield
- No damage to the Fruits Cell Structure
- Slow Spiral Technology which Slowly Squeezes the Juice

VS

Traditional Juicer

Lose

- Quick Oxidation
- Pulp & Juice Separation
- 50% Juice Yield
- Damage to the Fruits Cell Structure
- High Speed Blending

Real natural juice is from slow extraction

The slow juicer adopts the technique of low-speed spiral extraction, which rotates at a slow speed to squeeze the juice slowly like squeezing a towel without damaging the fruit's cell structure, but maintaining their nutrients.

What is natural juice ?

Natural juice is made from fruits and vegetables by means of physical extraction. It is 100% pure fruit juice without any additives. Natural Juice does not get oxidized easily, change its color or separate into layers.

Juice Presso Classic

The prime objective of any juice is to be a healthy drink. Keeping that in mind, Hi-Tech brings to you the Juice Presso Classic Slow Juicer. The slow spiral pressing technology takes the process of extracting juice from fruits and vegetables to a whole new level of purity. Unlike the regular high speed juicers, this slow juicer's patented slow pressing mechanism causes no damage to the fruit cell structure and preserves all the nutritious content. Along with that, the slow juicer gives as high as 85% consistent and smooth juice yield and causes no oxidation of the juice, as a result the juice stays fresh longer which makes it not only healthier but also a far more efficient tool of juicing.

Juice Presso Pro

Hi-Tech brings to you Juice PressoPro- Slow Juicer. The slow spiral pressing technology takes the process of extracting juice from fruits and vegetables to a whole new level of purity. Its super large inlet reduces the time and effort that goes in cutting the fruit into small pieces. It intakes small fruits as a whole and juice them with utmost precision. Along with that, the slow juicer gives more than 85% consistent and smooth juice yield and causes no oxidation of the juice, as a result the juice stays fresh longer which makes it not only healthier but also a far more efficient tool of juicing.

pH Chart Comparison

AA Revive Range

Hi-Tech's AA Revive Bottle revives the water and helps in creating Anti-Oxidant Alkaline water- on the go. This bottle makes use of Korean Bio Ceramic Technology that uses Ceramic Balls which displays high extrusion strength and zero percolation or deformation to ensure the purest and healthiest drinking water. Not only does the AA Revive bottle provides Mineralized Anti-Oxidant Alkaline (pH 7.5-8.5) drinking water but also adds essential nutrients like Calcium, Magnesium, Sodium, Potassium while regulating the Oxygen content in the water.

Why Alkaline Water? Your body needs a delicate acid-alkaline balance. Unfortunately, our Diet is rich in acidic substances and foods including meat, dairy, processed foods and sugar. As your body tries to adjust for the acidity, it borrows from your alkaline reserves, which can eventually result in chronic disease. This bottle turns the water alkaline that helps in maintaining the acid-alkaline balance without borrowing from valuable reserves, recharge your immune system, balance your body, and deliver optimal hydration.

EUROPEAN DESIGN

Festo

As you plan for your kitchen's look and safety, add this European design Hood to further enhance the elegance and design of your kitchen. The Hi-Tech Festo has an advanced 3 speed touch technology which allows to control the speed as per need, which makes it really convenient to use. A high quality stainless steel body and 2 pieces of SS Baffle filters make this machine extremely durable. With stainless steel oil collector, this chimney helps to protect your kitchen walls, cabinets and itself from getting spoilt. 6mm black tempered glass on the body makes it look extremely sleek and classy. Additionally, Festo series comes with the heat auto clean feature that saves you all the hassle of cleaning and maintaining the hood. This helps eliminating dust and oil residue automatically thereby reducing your time and effort. This powerful device displays an incredible suction capacity of 1000m3/h air flow, while consuming barely any power and making minimal noise.

Regalia Hobs Range

Hi-Tech with the latest German Technology brings to you its Regalia range, designed to suit your convenience along with the modern looks to fit rightin with your modular kitchen. This efficient cooktop not only allows you to cook excellent food but also is much safer compared to most of the other hobs in the market. Hi-Tech presents you a premium range of hobs at an economicalprice which comprises of the Flame Failure Safety Device (FFD) which automatically turns the gas off if the flame gets blown outin case of strong winds or if any liquid overflows and puts out the flame. Our safety device banishes the fear of igniting a spark if gas is still running after the flame is put out and this makes it very safe to use by anyone.

Hobs from Hi-Tech have patented Horisun burners that are made of premium quality brass that are most suited for Indian needs. Specially crafted for Indian cooking style, the burner is designed such that heat is evenly distributed for browning or roasting, making all types of Indian dishes perfect. The triple-flame burner offers 3.8kw power which helps in cooking at the right level of flame and for making perfect chapatis. Hi-Tech gas hobs are powerful for speedy cooking, and at the same time, gentle for simmering.

Strong cast iron pan support ensures that the pots/utensils get a steady platform and do not wobble. These iron supports also allow uniform distribution of heat to the vessel for ideal cooking.The rubber gaskets around the knob prevent water and any other liquid seepage into the knobs while cleaning. It also improves safety and enhances the life of the product.

The metallic knobs add to the life of the product, considering it is the most used appliance in the kitchen. Hi-Tech's hobs have auto ignition mechanism which makes it even safer and hassle-free to use. The drip trays catch any material falling from the burner. 8mm toughened glass body provides strength and safety to the product.

SinClean Gold

A highly advanced product in the world of garbage disposal, the **SinClean Gold** comes installed with a Panasonic motor that produces minimal to no sound while functioning. This quiet motor's long life span makes it not only efficient but extremely durable. A high capacity anti corrosion grinding chamber teamed up with anti corrosion stainless steel cutter make the Disposer highly efficient at its job without any obstruction. The French grinding blade guarantees waste removal to the finest, while the Taiwanese Micro switch and Overload protector ensures smooth functioning of the machine. The use of bearings with aerospace grade lubricants makes the machine all the more powerful and fault-free. A dishwasher interface makes it a right fit for a conventional as well as a modern kitchen. This machine is a perfect mix of design, power, and compact size. Give your kitchen the power of self-clean-up with Hi-Tech's SinClean Gold.
